## A WHOLE OF GOVERNMENT APPROACH IN FIGHTING FINANCIAL CRIME

Money laundering, corruption, terrorist financing, tax crimes, and other financial crimes can *threaten the strategic, political and economic interests* of both developed and developing countries. They deprive governments of revenues needed for sustainable development and some cases such abuse may go so far as to undermine the democratic basis of government itself.

They may be different types of crimes but they *all thrive in a climate of secrecy* and lax regulation and/or enforcement. Countering these activities therefore requires greater transparency and improved efforts to harness the capacity of different government agencies to work together to deter, detect and prosecute these crimes **through a whole of government approach**.

The links between these crimes are already being recognized. Both OECD and FATF are working on offshore compliance strategies; OECD from a tax policy and compliance perspective and FATF from the perspective of risks to anti-money laundering standards. In both its 2009<sup>1</sup> and 2010<sup>2</sup> Recommendations, the OECD has advocated greater co-operation and better information sharing between different government agencies involved in the fight against financial crimes both domestically and internationally. The OECD has developed practical guidance to better enable tax officials to detect bribes<sup>3</sup> and instances of money laundering.<sup>4</sup>

This conference, which brings together senior policy makers from different government agencies including the tax, anti-money laundering and anti-corruption communities, will explore approaches to closer co-operation both at domestic and international levels to more effectively fight financial crime. In a world where criminals operate easily and speedily across organisational and national boundaries, governments cannot stand still. The conference will explore such questions as: What are successful models for international co-operation have been used successfully? What can be achieved by working together? How best to design an architecture for international co-operation? How to unlock the potential that tax administrations can bring to the table? Representatives of business and civil society will be involved in some of the discussions to allow for a dialogue covering all stakeholders.

The conference will also showcase certain key risks in the tax and crime area, allowing countries to target resources and learn from the experience of others.

1 Recommendation on Tax Measures for Further Combating Bribery of Foreign Public Officials in International Business Transactions.  
2 Recommendation to Facilitate Cooperation between Tax Authorities and Other Law Enforcement Authorities to Combat Serious Crimes.  
3 OECD Handbook on Bribery Awareness for Tax Examiners is now available in 17 languages.  
4 OECD Handbook on Money Laundering is now available in 5 languages (English, French, German, Korean and Spanish).
