Production licences at 1 January 2004

The interests shown for each production licence apply to the licence as such, and not necessarily to fields which might lie within the licence. Interests will differ for unitised fields or for those in which the sliding scale has been exercised. See chapters 12-14 for information on interests in the various fields. Production licences which cover all or part of a field are indicated by the use of bold text in the heading for that licence. When the production licence covers only part of a field, the production licence(s) embracing the rest of field are shown in brackets next to the field designation in the heading [for example: from production licence 034: Tune (part) (+PL 053 and 190)]. The operator is indicated with an *.

Since interests are shown to no more than three decimal places, they may not add up to exactly 100 per cent in some production licences.

A total of five “stratigraphic” licences were awarded for the first time in 2003. This new type of licence is special because its acreage lies within established licences, and because the right to recover resources is confined to defined depth levels. The stratigraphic licences are designated BS or CS in the list.

1st licensing round

Field / PL	Block	Licensees (*Operator)	Share (%)
Balder/Grane (part) (+PL 169, 169B1 and 169B2)/Ringhorne (part) (+PL 027,027C,169)
